

STRUCTURAL ENGINEER

Type: Structural Chemical/Process/Mechanical Engineer

Organisation: Quality Environmental Consulting Ltd

Location: Cambridge

Seniority: Experienced

Description: Structural Engineer

- Diverse work environments
- Close team with job autonomy
- Dynamic, fun and challenging

QEC is a multi faceted consulting company with an extensive client base. With the ever-increasing demand for HSNO stationary container design and certification services, QEC is seeking a full time qualified engineer to ensure our client's needs are met.

As a qualified engineer you shall have proven experience in stationary container design, installation, maintenance and associated consultancy. Industrial knowledge and experience would be an advantage including experience with process control, environmental, safety or quality management systems, auditing and hazardous substance legislation.

The role would suit a person who has the ability to learn quickly and enjoys a challenging and varied work environment. In addition, we seek a motivated person who can work unsupervised, to deadlines, at our client's sites throughout New Zealand.

The key activities you will undertake include:

- Assessment of existing stationary container systems against legislative requirements,
- Design of new stationary container installations,
- General HSNO consultancy,
- Drafting plans,
- Preparation of compliance plans and supporting documentation,
- Process control work,
- General consultancy services.

We offer an interesting, varied work environment, accompanied by a choice of lifestyle options. Our office is located in Cambridge, but we deliver consultancy services throughout New Zealand so regular travel will be required. Specific training will be provided where required.

**Please send applications to
