

Start going places with a great team

Health and Safety Specialist

Keen to be part of a team which is driving health and safety improvements in a fast paced business?

We're committed to providing a safe place of work for our team members and contractors, and a safe experience for our many visitors and customers nationwide. You'll support this by using your advanced knowledge and experience of Health and Safety legislation and best practise, to further improve our Health and Safety Management System.

Reporting to the National Health and Safety Manager, you'll assist with the development and implementation of new Health and Safety policies and procedures, actively participate in the work safe team, ensure workplace compliance of policy and procedure and provide advice and coaching to managers nationwide. As the business champion of the Health and Safety database, your role will also have an analytical focus; using Health and Safety data and information to develop targeted interventions around injury prevention strategies.

The key factors for success in this role will include your experience with reporting and analysis of health and safety in a large organisation, together with your best practise approach and knowledge of health and safety. If you're a health and safety advisor in a large organisation wanting to take on a new challenge, this may be the next step in your career.

Whilst there'll be travel required, particularly at annual audit time and around work safe forums, you'll primarily be based at our fantastic location on the North Shore – which offers free parking and an onsite café! If you're keen to take on an exciting new role and work with a business that cares about and recognises individuals, apply now.

For more information and to submit your confidential application, please visit www.thewarehousecareers.co.nz and enter the job code 17341SFG. Applications close 5 September 2008.
