

Transfield Worley Ltd designs, builds and maintains industrial process plants. Transfield Worley is recognised as New Zealand's leading provider of industrial design, build and maintenance services by both our clients and our employees. We attract, retain and motivate high calibre, creative personnel and we ensure our people are given the tools, support and developmental opportunities they need to deliver results. Transfield Worley employs around 700 personnel in New Zealand, covering the full range of engineering and construction disciplines.

HSE ADVISOR

STOCKTON, WESPORT

We require the services of a HSE Advisor with a minimum of ten years petrochemical, or related industry experience, to join the Project Team based at Stockton, Westport.

For this Westport based 18 month fixed term role we require applicants to:

- Be currently studying towards a Diploma in Safety Management (or equivalent);
- Be competent in operating a project safety management system;
- Demonstrate HSE coordination skills;
- Have a thorough understanding of statutory requirements;
- An understanding of working within an operational plant environment;
- Have experience in advising staff and subcontractors;
- Have an understanding and ability to work within an integrated project team environment.

This role is supported by the centres of expertise residing within the parent companies Transfield Services and WorleyParsons.
