

Operational Safety Advisor

Based in our South Taranaki Gas Processing Plant, join our tight-knit Kapuni team and assist Vector develop, maintain and promote safety management systems and standards. As one of our onsite team you will enjoy flexible working hours, technically savvy colleagues, a genuine community feel and the chance to take a regional lead in our journey to a zero harm HSE culture.

You have 3-5 years experience in a safety oriented role, preferably within either PetroChem or continuous manufacturing environments. Your career to date has equipped you with a strong appreciation for safety management within high hazard facilities and you understand what makes a solid Quality Management system function. Any exposure to Process Safety Management systems, including HAZOP, risk assessment and analysis, lead/lag KPI's and RCA would be a great bonus!

As safety is behavioural above all, your ability to influence complements proven communication and relationship management skills which underpin your passion for safety improvement.

To apply for the above role go to www.vector.co.nz/careers or call the Careers Centre on 09 978 7788.

Applications close 21 May 2010.

Vector is a multi-network infrastructure company which owns and operates a range of energy and technology businesses and assets that touch over a million New Zealand homes and businesses
